As at **31 August 2021**, the Fund was at its high water mark being the highest cumulative gross return since inception and no further performance fee will become payable until this high water mark is exceeded. The performance fee is calculated as 20% of absolute returns above the high water mark.

The historical average since the Fund's inception for the performance fee is 2.16% per annum. In any year, this historical average will differ depending on the performance of the Fund and its underlying investments relative to the net assets of the fund during the relevant financial year.

The historical average since the Fund's inception has been calculated on performance fees paid from the Fund as follows:

Performance Fees (%)	0.47%	6.02%	0	2.16%

Note that past performance is not a reliable indicator of future performance. It is not possible to forecast the performance of the Fund and in some years there may be a negative performance. In addition, all management costs are deducted from the Fund's assets, and are not directly paid by you.

## Transaction costs

The Fund's total gross transaction costs for the 12 months ending 30 June 2022 were 0.33% of the gross assets of the Fund (e.g. \$167 for every \$50,000 of net assets), made up as follows:
